Patching phpIPAM per amministratori (non super)

./app/subnets/addresses/address-modify.php

```
<              print ' <input type="text" name="mac" class="ip_addr form-
control input-sm" placeholder="'._('MAC address').'" value="'.
$address['mac']. '" size="30" '.$delete.'
disabled="disabled">'.$mcast_help_block;
<              print ' <input type="hidden" name="mac" value="'.
$address['mac']. '">';
---
>              print ' <input type="text" name="mac" class="ip_addr form-
control input-sm" placeholder="'._('MAC address').'" value="'.
$address['mac']. '" size="30" '.$delete.'>'.$mcast_help_block;
>              #print ' <input type="text" name="mac" class="ip_addr form-
control input-sm" placeholder="'._('MAC address').'" value="'.
$address['mac']. '" size="30" '.$delete.'
disabled="disabled">'.$mcast_help_block;
>              #print ' <input type="hidden" name="mac" value="'.
$address['mac']. '">';
```
